

**National Consumers Electricity
ADVOCACY PANEL**

MORE ADVOCACY REPORTS

Six reports of submissions or studies by end user representative groups have been added to the two already on the website and all have been collected under a new Advocacy Reports icon. Another report, by EMRF to the ACCC on the Transgrid/EnergyAustralia revenue cap (no 38.03), is to hand and will be placed on the site when a further electronic version is received.

A further two reports, on connection and network price information (no 10.03 by Exigency Management) and a submission by EUAA to the Reliability Panel on VOLL (no 29.03), are expected to be completed soon.

All reports will be considered by the panel at its next meeting, on 10 March 2003,

These reports are substantially paid for by the panel. However the views they express are those of their authors or organisations and not those of the panel.

The 10 March meeting of the panel (originally planned for 3 March) will be in Canberra. Any application for consideration at this meeting should be with us by Tuesday 24 February 2004.
