

**NATIONAL CONSUMERS ELECTRICITY
ADVOCACY PANEL**

MAY/JUNE 2005 UPDATE

Summary of funding decisions from May/June 2005

Application 117: Energy Users Coalition of Victoria - Respond to Essential Services Commission of Victoria Electricity Distribution Price Review 2006-2010 papers. On 6 June the application was approved for funding of \$35,900 excl GST.

Application 132: Electricity Consumers Coalition of South Australia - Respond to ETSA appeal against ESCoSA final determination on price cap. The application was rejected on the grounds that:

- The applicant does not have standing to make a submission to the appeal. It may not be appropriate for the regulator to accept a submission from the applicant given that lack of standing.
- Some of the listed activities e.g. "request data on cost allocation and review responses" would not seem to be possible.
- Neither ESCoSA nor the SA Government has called for further public submissions.
- ECCSA have no issue with anyone, or at least they have not advised the Panel of them in the application.
