

NATIONAL ELECTRICITY CONSUMERS ADVOCACY PANEL

Summary of funding decisions made by the Panel during February 2008

1. Application 292: Australian Council of Social Service - Professional development for consumer advocates - climate change, energy efficiency and emissions trading

The application was approved for funding of \$6,800 excl GST.

2. Application 293: Australian Council of Social Service - Online resources for energy market advocacy

The application was rejected on the grounds that although the project is intended to centralise information on a single website, it will represent a duplication of information that exists on other websites where interested parties would normally seek it and the cost of maintaining and updating the website has not been considered in detail and is likely to be material;
